

FUTUREWORLD PUBLISHING INTERNATIONAL PRESS RELEASE

P.O. Box 301, Walls, MS 38680

— ***Announcing Our New “The Reality Engineers” Book is Now Published*** —

FOR IMMEDIATE RELEASE:

Exciting Announcement of the official publication of the long awaited UFO/ET/UT adventure by Dr. Jaysen Q. Rand with his space friend A-Lon from Planet Epsilon Prime found in the Arcturus star system, Constellation Boötis, roughly 36.7 light-years distant from planet Earth.

WALLS, MS, June 15, 2020: Futureworld Publishing International announces the pre-release of Dr. Jaysen Q. Rand’s newest book...*The Reality Engineers...* “*A Reality Engineering-101 Journal.*”

We all live on a fragile, magnificent, living planet seemingly lost and alone — cast within an immense Universe so vast that it’s far beyond our human imagination or logical reasoning.

Our good Mother Earth (Gaia, as she was known to the ancients), is an atypical life-supporting world especially created for hosting and sheltering all formats of sentient life...including humankind.

And for the moment, it would seem to appear that we may be the only planet within our solar system, our local galaxy, and the known Universe—capable of supporting such a marvelous collection of unique and exotic life forms including the genus, *Homo sapiens*.

Admittedly, we humanoids are a curious, war-like, sometimes intelligent, loving, hateful, forgiving, combative, egotistical, maniacal, enlightened and often creative species; we are also quite egg-headed, free-willed, mortal human beings! —Through and because of our flawed human natures, we are also self-addictive and self-destructive to the end!

But is Gaia the only habitable planet anywhere near our sector of the Universe capable of hosting elevated life forms, animals, plants/trees, birds, insects, reptiles, fish? Or, do we in fact, possess an abundance of both newly found and ancient documentation readily available to our present-day culture from the most recent, near and distant past, challenging this now outmoded, scientific, political and religious misjudgment of true facts?

And furthermore, recent evidence supports an ever-increasing volume of this data which strongly suggests/documents scientific evidence to the contrary. With rare exception, this new datum reveals the undiscovered nature of our ‘human cosmic reality.’ And it relates to the vast volumes of past historical records, artifacts and cryptic signs all left to us by rapt ‘civilizations’ and our many surviving ‘native cultures’ found worldwide on every continent.

Lemuria, Atlantis and countless other legends of lost time—all hint at what be just the tip of the iceberg of humanities’ forgotten and buried secrets of our time/space/eternity realities.. These translucent points of testimony trace spiritual, physical and material residue left behind on this world from ancient extraterrestrial/ultraterrestrial visitations.

This sacred, arcane testimony is valid evidence that could soon become a brand new chapter written about our missing planetary history and its’ karma...this intrinsic information is

gleaned from the most ancient of times since primitive humans first walked this rock eons ago. And so we wonder—were these first versions of modern-day humanoids the first true “*Reality Engineers*” seeded early-on to populate Gaia by the ET/UT ‘Sky People’—as the ancient aliens advocates and present-day theorists identify them?

Here in terms of our 21st century existence, we Earthian mortals seemingly exist upon a world of pure physicality, uniquely different from any other planet in our solar system, or that of our closest neighboring star, the great Alpha Centauri—just a mere 4.5 light-years away, or roughly 27-trillion miles from life and its reality here on the third rock from the Sun.

Consider for a brief moment that what you see—or think you see—when gazing up into the splendor of the heavens! On a clear night especially when you’re lucky enough to be alone somewhere out in the desert—or maybe cruising across the ocean totally away from civilization—modern-day cosmologists estimate the number of stars visible to the naked eye number around 8,000—with no more than 2,800 of those stars visible at any one time from any single viewing point across the Earth’s vast surface.

However, Dear Readers...most modern-day astronomers confidently estimate there are approximately 350-400 billion stars in the Milky Way galaxy alone containing the rich potential for them hosting solar systems like ours perfect for supporting life-bearing planets.

Herein lies the schematic for our story of “*The Reality Engineers*” and Jaysen Q. Rand’s “contactee” relationship with them written in a compelling ‘novel format’...one designed to keep you reading page, after page, after page...as Jaysen and A-Lon take you on their never-ending odyssey written across the scrolls of time and space.

A large and significant segment of Rand’s newest adventure is the presentation of his childhood experiences in 1951 at age 12 (as a UFO/ET “contactee”...the turning point that has forever shaped his life while increasing his working knowledge. We also find that Dr. Rand becomes aware of his past lifetimes and the myriad interconnections with ET/UT (exobiological entities) as forecasted by his friend and mentor...world-famous author, Presidential advisor and seer, Ruth Montgomery, Washington, D.C., (June 11, 1912 to June 10, 2001).

“*The Reality Engineers*” saga may become the most hopeful “contactee” account you will ever read! In this case, the “contactee” (Dr. Jaysen Q. Rand), has had numerous positive encounters with these ‘good-guy’ aliens, which then prepared him for the very intimate and friendly encounter chronicled in his newest work.

To the extent that you will understand and believe this tome, we can find in it a great deal of meaning for our much-troubled world. As always, what we learn here is subject to our own experiences and interpretations, but the clear message Dr. Rand shares us is one of ‘hope’ and ‘promise’ and ‘positive outcomes’ for humanity on planet Earth.

As the human race approaches dire consequences threatened by present-day cosmic events and our continued abuse of Earth and its incredible array of living creatures, most of us hope for and would welcome contact with ‘higher intelligence beings’ who would want to share their advice, knowledge and advanced technologies with us.

Dr. Rand’s book addresses these vital issues and invites you to come visit with him aboard the ‘Arcumic’...A-Lon’s scout-ship (see illustration) for a most exciting and dramatic adventure

Press Release Page Three:

as these two 12-year old friends share their intimate experiences and consciousness's with the world at large.

Join with us as Jaysen continues on with his Earthly "contactee" responsibilities becoming a musician, author and metaphysical teacher in the 21st century. He's now completed all but the last of his five books...*"Sit On It"*...which is now in the writing phase.

Available now as a special two-book author-signed set...purchase both

"The Return Of Planet-X" and "The Reality Engineers"

books for a reduced rate of \$45.99 + \$8.95 S&H ...saving \$18.91 off price from book covers.
